

Alan Lee

alanlee03162004@gmail.com | alan-lee7.github.io/Portfolio Website/ | linkedin.com/in/alan-lee-rpi/

Skills

Programming Languages: C++, C, C#, Java, Dafny, Swift, MIPS, HTML, Systems Verilog, CSS

Computer Science Software: Git Version Control, Visual Studios Code, Unity, Linux

Computer Engineering Software: Arduino, KiCad, Siemens CAD, Quartus Prime, ModelSim, LTSpice, Scopy

Office Suite: Word, PowerPoint, Excel, Outlook, OneDrive

Experience

Information Technology Intern, Havas Health – NY, NY

May 2023 – Aug 2023

- Ensured a smooth onboarding process by assisting 100+ new employees, freelancers, and interns
- Handled and resolved 50+ technical support requests through the company's ticketing system
- Diagnosed 50+ problems with remote desktop tools and solved them through system configuration, or escalated the issues to senior while providing detailed notes for seamless handoffs
- Contributed to a 10% reduction in tickets by adding to the company's step-by-step troubleshooting guide

Information Technology Intern, Havas Health – NY, NY

June 2022 – Aug 2022

- Prepared and deployed 100+ laptops for staff by applying standardized images, ensuring consistent system and software configuration, and reducing imaging time by 20%
- Assembled and configured 20+ desktops for the workplace, improving the user experience by 10%
- Organized and labeled the IT storage closet and server rooms, reducing clutter by 20% and improving work efficiency

Extracurricular

President, Rensselaer Electric Vehicle

January 2023 – Present

- Presented to 10+ events and classrooms to promote awareness and drive interest in the club's initiatives
- Enforced strict safety protocols during two test drives, ensuring a secure environment for participants and the public while achieving zero incidents or accidents throughout all driving activities conducted
- Spearheaded the development of the club's vehicle GPS systems by designing control systems, developing PCB layouts, and programming embedded code, ensuring reliable performance and functionality.

Projects

Seeing Eye-Robot

- Engineered and implemented navigation and motor control systems for seamless robotic movement
- Contributed to the wireless connection between the robot and a mobile phone, ensuring real-time communication
- Led a team of six engineers, driving timely completion of project milestones and fostering team collaboration

Interface PCB

- Designed a two-layer printed circuit board using KiCad, integrating multiple automotive systems into a cohesive unit
- Crafted a well-organized PCB schematic integrating multiple automotive subsystems and optimized the layout for clear, easy identification of components and their functions

Wordle Server

- Built and rigorously tested a Wordle application leveraging TCP/IP protocols to manage multiple client connections and concurrent game states, ensuring each player's game operated independently without interference from others
- Refined core logic of a competitive multiplayer Wordle server focusing on independent client connectivity; facilitated smooth operations across five concurrent games without lag or interference between players

Education

Rensselaer Polytechnic Institute – BSc in Computer Engineering & Computer Science

GPA: 3.57

May 2026

Related Coursework:

Data Structures & Algorithms, Computer Communication Network, Principles of Software, Embedded Control, Operating Systems, Computer Components and Operations, Computer Hardware Design
